

Software Engineer CV

Trịnh Hữu Dương

Software Engineer

Cổ Nhuế, Bắc Từ Liêm, Hanoi, Vietnam
(+84) 916 526 901
duongtrinh1012@gmail.com

Professional Summary

Full-Stack Software Engineer with 3+ years of experience developing enterprise-scale web applications using NestJS, Laravel, Next.js, and React. Capable of independently delivering projects end to end, including system development, testing, and direct administration of Linux/AWS servers through command-line operations, port configuration, Nginx/SSL setup, backups, and server hardware upgrades.

Recognized for rigorous logical thinking in solving business problems across 3CX telecommunications, VietQR payments, Bitrix24 CRM, and cost-estimation breakdowns, as well as for mastering AI Agent-assisted development methods to accelerate product completion with a high degree of accuracy.

Technical Skills

- **Core Focus:** Full-Stack Development, System Architecture (MVC, Modular, Microservices), Database Design, Server & Cloud Operations, AI Agent Applications for Optimizing Software Development Workflows
- **Technologies:** Web Application Development, Web Services, RESTful APIs, WebSockets (Real-Time), Message Queues (Background Task Processing), Agentic Workflows
- **Front End:** TypeScript, JavaScript (ES6+), React.js, Next.js (App Router), Angular, HTML5, CSS3, SCSS, jQuery, Ajax
- **Back End:** NestJS (Node.js/TypeScript), PHP (OOP, MVC), Laravel Framework, Modular & Microservices Architecture
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis (Cache & Queue), Drizzle ORM, Prisma ORM, SQL Query Optimization
- **Infrastructure:** Linux (CentOS 7, Ubuntu), AWS EC2 (Operations, Port Configuration, AMI Backups), Docker, Nginx (Reverse Proxy, Multi-Web Routing), CI/CD
- **UI & State Management:** TailwindCSS, TanStack Query (React Query v5), TanStack Table v9, Base UI, Radix UI, Framer Motion, Zustand, Ant Design, Bootstrap
- **Mobile & Cross-Platform:** Capacitor (Android & iOS), Dexie (IndexedDB Offline-First), PWA, Electron Desktop

- **Testing & Security:** Jest, TDD (Test-Driven Development Red-Green-Refactor), Postman API Testing, OWASP Security Hardening Checklist, Automated Workflow Testing
 - **Tools & AI Engineering:** AI Agentic Workflows (.agents), Claude Code, OpenAI & Gemini APIs, Prompt Engineering, Git/GitHub, Bitrix24 API, 3CX PBX VoIP API
 - **Soft Skills:** Problem-Solving, Risk & Systems Management, Rapid Learning and Adoption of New Technologies, Strong Ownership, Effective Teamwork
-

Education & Certifications

- **Aptech ITT Certificate:** Mar 2022 – Oct 2022
- **Bachelor of Civil Engineering:** University of Transport Technology: Sep 2015 – Mar 2020

Academic Achievements

- Received a good-level scholarship in Term I 2017 and an excellent-level scholarship in Term II 2017
 - Received an excellent-level scholarship in 2018 and won third prize for a negative skin friction project
 - Received an outstanding scholarship in Term I 2019
 - Successfully defended a thesis in 2020 with a score of 9.5/10
-

Work Experience

Jan 2026 – Present

Freelance Software Engineer, Hanoi

- **FetchCRM - Enterprise Operations** (Dec 2025 – Jan 2026) — Enterprise CRM for logistics and multi-module operations coordination. Deeply integrated with the three-phase .agents workflow, BullMQ background jobs, Socket.IO real-time communication, and Zalo API.
- **DuongUy Chat - Realtime Ecosystem** (Jul 2025 – Nov 2025) — Cross-platform chat application for Web, Electron Desktop, and Android/iOS mobile through Capacitor. Anti-slop interface applying Taste Skill & Impeccable, with IndexedDB offline-first capabilities.
- **Smart Living & Apartment Portal** (Apr 2025 – Jul 2025) — Apartment and rental-room chain management system with 12 administrative modules, automatic invoice debt reconciliation through SePAY/Casso Webhook, and remote control of smart IoT locks.
- **E-Commerce** (Jul 2024 – Mar 2025) — Industry-specific e-commerce site featuring an automated technical cost-estimation breakdown algorithm for aluminum and glass based on dimensions, along with a TipTap Rich Editor article system.

Apr 2024 – Jun 2024

Software Engineer (Systems Operations), LET Joint Stock Company, Hanoi

Project Overview: Delivered critical security patches and feature updates for an on-premise Bitrix24 CRM application used in business operations.

- Conducted a comprehensive assessment of hardware capacity and operating-system compatibility before carrying out a full system overhaul.
- Implemented automated data backups through AWS AMI to ensure high availability and data security.
- Upgraded the server operating-system environment from CentOS and successfully migrated legacy systems from PHP 8.1 to PHP 8.3.
- Deployed new Bitrix24 features while maintaining backward compatibility for custom-built legacy modules.
- Debugged and optimized the automated “Leave Request” workflow to ensure full compatibility with PHP 8.3.

Jun 2023 – Apr 2024

Full-Stack Software Engineer, LET Joint Stock Company, Hanoi

Project Overview: Designed the architecture and developed a modern web interface and high-conversion landing page for Vietnam’s leading chilled-meat brand (Meatdeli.com.vn).

- Designed and structured a robust relational database while developing the administration dashboard.
- Built scalable front-end and back-end components using modular programming practices.
- Redesigned the homepage with a modern, responsive user interface, significantly improving visibility and user conversion rates.
- Coordinated seamless CI/CD project deployments across Mock and Production servers.

Jan 2023 – May 2023

Full-Stack Software Engineer, LET Joint Stock Company, Hanoi

Project Overview: Built an automated QR-code payment gateway for users to top up 3CX calling packages.

- **Back End & Security:** Built a scalable MVC architecture with Laravel and RESTful APIs, implementing secure JWT authentication.
- **Front End & UI:** Built a dynamic ReactJS interface allowing users to select payment amounts and upload receipts.
- **Access Control:** Developed a comprehensive administration portal with detailed Role-Based Access Control (RBAC).
- **System Integration:** Integrated a Telegram bot to provide real-time payment-verification notifications and automate top-up coordination with the 3CX system.

Nov 2022 – Jan 2023

Software Engineer, LET Joint Stock Company, Hanoi

Project Overview: Built an enterprise project-management tool to automate task routing and calculate construction volume, labor, and profit margins.

- Designed the database schema architecture while developing the administration dashboard.
- Built automated task-routing logic for cross-department workflows and managed detailed CRM permissions.
- Integrated asynchronous API calls using jQuery and Ajax to synchronize data in real time with Bitrix24.
- Led UAT and Production deployments, conducted extensive testing, and prepared technical documentation.

Software Engineer, LET Joint Stock Company, Hanoi

Project Overview: Maintained and upgraded the corporate website for Masan Group, focusing on UI/UX optimization and data presentation.

- Developed new front-end components, including an integrated FAQ section, and modernized the footer layout.
- Debugged and resolved complex back-end data-retrieval issues in the Investor Relations and News modules.
- Managed end-to-end testing and deployment pipelines across Mock and Production servers.

Software Engineer (Modernization), LET Joint Stock Company, Hanoi

Project Overview: Led the modernization of a large-scale legacy system, upgrading the Masan Bitrix ecosystem from PHP 5.6 to PHP 8.0.

- Built a phased migration strategy (PHP 5.6 → 7.4 → 8.0) to minimize downtime risks.
- Refactored legacy code, resolved deprecation warnings, and updated dependencies to meet modern security standards.
- Configured multi-web routing and optimized application performance on CentOS 7 servers.

Software Engineer & DevOps, LET Joint Stock Company, Hanoi

- **Server Management:** Managed operations for high-traffic corporate domains and specialized seafood portals. Performed automated backups, resolved MPA web-code errors, and managed domain configuration.
- **CRM Development:** Developed custom workflows and business-logic modules in Bitrix24 CRM for enterprise customers.
- **Web Development:** Built the “Invest in Vietnam” landing page and restructured the UI layout to increase foreign-investment appeal.

Software Engineer, LET Joint Stock Company, Hanoi

Project Overview: Designed the architecture for the “Gà Ngon Lá Chanh” landing page to promote new partner products and drive customer conversions.

- Designed the database schema and developed the administration dashboard.
- Built modular front-end components, optimized the user experience, and coordinated with the content team.
- Managed CI/CD pipelines and deployed the project across Mock and Production servers.
