Professional Summary

Results-driven Software Engineer with over 3 years of experience in architecting, developing, and optimizing high-performance web applications. Skilled in full-stack developments, databases, deployments and testing. Proven ability to independently execute end-to-end technical projects, maintain AWS server environments (including backups, system upgrades, configurations, and SSL deployments), and deliver robust software solutions that drive business efficiency and enhance user experience.

Professional Skills

Core Focus	Full-stack dev, Database design, Deployments, Testing
Technologies	Web app dev, MVC, Web Services, RESTful APIs
Front-end	HTML, CSS, SCSS, JavaScript, jQuery, Ajax, React.JS
Back-end	PHP (OOP, MVC), Laravel framework
Databases	SQL, MySQL, MongoDB
Infrastructure	CentOS, Ubuntu, Server Administration
UI Frameworks	Bootstrap, Ant Design
Testing & QA	Postman, SQL, Automated workflow testing
Tools	Git, AI tools, Canva, Snagit, Greenshot, Lightshot
Soft Skills	Logical thinking, Problem solving, Fast learner, Proactive, Teamwork, Responsible

Experience

- Jan 2026 – Present **Software Engineer, LET Joint Stock Company, Hanoi**
- Project Overview:** Managed the AWS cloud infrastructure and maintained seamless operations for enterprise clients utilizing LET's software products.
- Orchestrated overall company infrastructure operations and provided advanced troubleshooting for partner systems.
 - Expanded 3CX server partitions, seamlessly mounted massive recording datasets (Long Bien Gold), and allocated scalable storage.
 - Engineered hardware upgrades for AWS instances, utilizing Amazon Machine Images (AMI) for zero-downtime migrations.
 - Debugged and resolved complex system anomalies, including the Vinh Tuong Digital Signature (CKS) integration error.
 - Developed and deployed dynamic database updates for Meatsdeli.com.vn's QR-based quarantine quality tracking system.

- Dec 2025 – Jan 2026 **Software Engineer (System Operations), LET Joint Stock Company, Hanoi**
Project Overview: Executed critical security patches and feature updates for the Bitrix24 on-premise CRM application used in enterprise operations.
- Conducted comprehensive hardware capacity and OS compatibility assessments prior to major system overhauls.
 - Implemented automated data backups via AWS AMIs to ensure high availability and data security.
 - Upgraded server OS environments (CentOS) and successfully migrated legacy systems from PHP 8.1 to PHP 8.3.
 - Deployed new Bitrix24 features while ensuring backwards compatibility for custom-built legacy modules.
 - Debugged and optimized the Leave Request automated workflow for full PHP 8.3 compliance.
- Jul 2025 – Nov 2025 **Full-Stack Software Engineer, LET Joint Stock Company, Hanoi**
Project Overview: Architected and developed a modern web interface and high-conversion landing pages for Vietnam's leading chilled meat brand (Meatdeli.com.vn).
- Designed and structured robust relational databases and developed the administrative dashboard.
 - Engineered scalable front-end and back-end components using modular coding practices.
 - Redesigned the homepage for a modern, responsive UI, significantly optimizing display and user conversion rates.
 - Orchestrated seamless CI/CD project deployments across Mock and Production servers.
- Apr 2025 – Jul 2025 **Full-Stack Software Engineer, LET Joint Stock Company, Hanoi**
Project Overview: Engineered an automated QR-based payment gateway for users to top up 3CX call plans.
- **Backend & Security:** Engineered a scalable MVC architecture using Laravel with RESTful APIs, implementing secure JWT auth.
 - **Frontend & UI:** Built a dynamic ReactJS interface enabling users to select payment amounts and upload receipts.
 - **Access Control:** Developed a comprehensive admin portal with granular Role-Based Access Control (RBAC).
 - **System Integration:** Integrated a Telegram bot for real-time payment verification notifications and orchestrated automated 3CX system top-ups.
- Jul 2024 – Mar 2025 **Software Engineer, LET Joint Stock Company, Hanoi**
Project Overview: Built an enterprise-grade project management tool to automate task-routing and calculate construction volumes, labor, and profit margins.
- Architected database schemas and concurrently developed the administrative control panel.
 - Engineered automated task-routing logic for inter-departmental workflows and managed granular CRM permissions.
 - Integrated asynchronous API calls using jQuery and Ajax for real-time data synchronization with Bitrix24.
 - Led UAT and Production deployments, conducted extensive testing, and authored technical documentation.
- Apr 2024 – Jun 2024 **Software Engineer, LET Joint Stock Company, Hanoi**
Project Overview: Maintained and enhanced the corporate website for Masan Group, focusing on UI/UX and data display optimization.
- Developed new front-end components including an integrated FAQ section and modernized footer layout.
 - Debugged and resolved complex back-end data retrieval errors in the Investor Relations and News modules.
 - Managed end-to-end testing and deployment pipelines on Mock and Production servers.

- Jun 2023 – Apr 2024 **Software Engineer (Modernization), LET Joint Stock Company, Hanoi**
Project Overview: Spearheaded a major legacy system modernization, upgrading the Masan Bitrix ecosystem from PHP 5.6 to PHP 8.0.
- Engineered a step-by-step phased migration strategy (PHP 5.6 → 7.4 → 8.0) to mitigate downtime risks.
 - Refactored legacy codebases, resolved deprecation warnings, and updated dependencies to ensure modern security standards.
 - Configured multi-web routing and optimized application performance on CentOS 7 servers.
- Jan 2023 – May 2023 **Software & DevOps Engineer, LET Joint Stock Company, Hanoi**
- **Server Management:** Managed operations for high-traffic corporate domains and specialized seafood portals. Executed automated backups, resolved MPA web code errors, and managed domain configurations.
 - **CRM Development:** Developed custom workflows and business logic modules within the Bitrix24 CRM for enterprise clients.
 - **Web Development:** Engineered the "Invest in Vietnam" landing page and restructured UI layouts to boost foreign investment engagement.
- Nov 2022 – Jan 2023 **Software Engineer, LET Joint Stock Company, Hanoi**
Project Overview: Architected the "Lemon Leaf Delicious Chicken" landing page to promote new partner products and drive customer conversions.
- Designed database schemas and developed the administrative control panel.
 - Engineered modular front-end components, optimizing user experience and collaborating with the content team.
 - Managed CI/CD pipelines, deploying the project across Mock and Production servers.
